

Press Release

ASKA Achieves Score of B in Climate Change, B- in Water Security at CDP2024

TOKYO, February 10, 2025 – ASKA Pharmaceutical Holdings Co., Ltd. (TSE: 4886, Head Office: Minato-ku, Tokyo/ President, Representative Director: Takashi Yamaguchi, hereinafter “ASKA”) is pleased to announce that it has responded to CDP2024 for the first time, achieving a "B" score in "Climate Change" and a "B-" score in "Water Security" at CDP2024.

CDP is a non-profit organization that operates the world's only independent environmental information disclosure system, and many companies, financial institutions, and local governments use CDP's system to manage their environmental impact. CDP evaluates the data reported by the organizations that disclose information using its own methods and scores it on an eight-point scale (A, A-, B, B-, C, C-, D, D-). In CDP2024, more than 24,800 companies around the world responded, and more than 2,100 Japanese companies, including more than 70% of prime market listed companies, are said to have disclosed information. The “B” and “B-” scores that ASKA has achieved this time indicate that it has been evaluated as having a management level where it understands and takes action regarding its environmental risks and impacts.

ASKA aims to become a "Total Healthcare Company with a Strong Foundation as a Specialty Pharma Company" in its Medium-Term Management Plan 2025. On the environmental front, ASKA recognizes the global climate change issue as a management issue that will have an impact on its business and is actively working to address climate change issues.

ASKA views this evaluation as a recognition that the Group's efforts to address climate change align well with societal expectations and will continue to pursue sustainability, including ongoing decarbonization.
